

Hi Everyone! We hope all is well. We are putting a different spin on the lessons this week. There are **two fun videos** of tricks and challenges posted. See if you can figure them out first and then see if a family or friend can figure them out!

We also have a great recommendation for a **Family Movie Night: *October Sky*** - An inspiring true story

A teenage boy from a West Virginia coal mining town dreams of becoming a rocket scientist. If he can make it to the national science fair, he may get a college scholarship. Watch what happens when he uses his knowledge of quadratic functions to defend himself when he is falsely accused of a crime.

[Rotten Tomatoes score is 91%] PG rated

**\*\*Please Note:**

Activities are to be done at your own pace. You can choose to do it all or you can do as much as you can.

Monday is the perfect day to watch a movie with your family or watch virtually with a friend or two.

Tuesday's Review Stations are for extra practice on the units of quarter 3. Pick the stations that you feel you might need a little extra practice with. Or do them all if you think that's fun!!

This week is supposed to be fun and educational at the same time! Enjoy!
